

SharePoint 2010 Shared Hosting Pricing

Installing, configuring and maintaining the server infrastructure needed to have SharePoint available at all times can be a daunting (not to mention costly) task. A hosted solution is ideal if:

- Your organisation is small, without a server in your office
- Members of your team are geographically dispersed
- You're part of a large organisation where licensing costs and complexities point towards outsourcing
- You want to get started and evaluate SharePoint before investing in infrastructure

All hosting

- Is provided via dedicated, redundant international hosting infrastructure.
 - Offers an unlimited number of users.
 - Supports your own domain name.
 - Based on SharePoint Foundation Services 2010.
- Hosting excludes configuration and implementation of SharePoint, as well as any configuration related support.
 - Hosting is billed on a monthly basis via debit order.
 - All pricing is in South African Rands (ZAR).

To order, contact a member of the bSOLVe team, who will gladly assist you with setting up and configuring your SharePoint To-Go or full SharePoint site on a sub domain (i.e. <http://sharepoint.yourdomain.co.za>) or domain of your choice?
